

使用 express + fluent-ffmpeg插件

### 1、安装 `ffmpeg`

make sure you have `ffmpeg` installed on your system

### 2、安装模块 fluent-ffmpeg

<https://github.com/fluent-ffmpeg/node-fluent-ffmpeg>

### 3、测试代码

```
var ffmpeg = require('fluent-ffmpeg');
var fs = require("fs");
// open input stream
var infs = fs.createReadStream(__dirname + '/b.rmvb');

infs.on('error', function(err) {
  console.log(err);
});

// create new ffmpeg processor instance using input stream
// instead of file path (can be any ReadableStream)
var proc = ffmpeg(infs)
  // set video bitrate
  .videoBitrate(1024)
  // set aspect ratio
  .aspect('16:9')
  // set size in percent
  .size('50%')
  // set fps
  .fps(24)
  // setup event handlers
  .on('end', function() {
    console.log('file has been converted succesfully');
  })
  .on('error', function(err) {
    console.log('an error happened: ' + err.message);
  })
  // save to file
  .format('mp4')
  // save to file
  .save('./b.mp4');
```
